- **WHAT STANDARDS DOES IT MEET?**
 - ASTM D6954-04(2013) American standard for exposing and testing plastics that degrade in the enviroment by a combination of oxidisation and biodegradation. This covers:
 - Tier 1 - Degradability
 - Tier 2 - Biodegradation
 - Tier 3 - Eco-toxicity
 - Regulation (EC) No. 2023/2006 approvals for plastic coming into contact with food.
- THE LIFE CYCLE OF OUR ECO-STRAW**

STEP ONE
Oxo-biodegradable additive "Reverte(BD93470)" is added at the manufacturing stage and extruded at the factory into our ECO-STRAW.

STEP TWO
The product behaves like any other during it's intended service life. The shelf life of our product (un-opened) maintained at 20°C is 18 months from the manufactured date.

STEP THREE
The useful life (dwell time) of our product is approximately 2-4 months once the product has been opened.

STEP FOUR
After it's useful life the oxo-biodegradable additive takes effect and the product begins to degrade in the presence of oxygen. After 4 months of opening, the product will begin to show signs of the photo-initiation process, and then a rapid breakdown of properties resulting in acute embrittlement after a further 3-6 months.

STEP FIVE
The product will end up in a landfill environment where the biodegradation will take over and eventually the product becomes carbon-dioxide, water and biomass.
